Art Unit: 3728

1. The applicants' refer to drawings submitted on August 28, 2009. However, no drawings are part of the last response.
2. It is now clear that there has been no submission of separate formal drawings of record in this application. It is required that drawings be furnished in response to this action, and failure to do so will be held non-compliant.
3. In view of the papers filed July 6, 2007, it has been found that this nonprovisional application, as filed, through error and without deceptive intent, improperly set forth the inventorship, and accordingly, this application has been corrected in compliance with 37 CFR 1.48(a). The inventorship of this application has been changed by adding Karina Candrian as one of the inventors.

The application has been corrected by the Office of Initial Patent Examination (OIPE) for the Office records to reflect the inventorship as corrected.

4. Claim 46 is objected to because of the following informalities: In line 7, respectively should be followed by a comma. Appropriate correction is required.
5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3728

6. Claims 35-37 and 39-52 are finally rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 35, line 3, "the surgical instrument" lacks antecedent basis and is indefinite in its relationship to the previously defined "surgical component". See also lines 6 (twice) and 10.

In claim 46, line 5, the holes are not collectively "configured to receive a (single) surgical component" as recited.

7. Applicant's arguments, filed August 28, 2009 have been fully considered and are persuasive. The art grounds of rejection have been withdrawn. However, formal drawings are not found as have been required. Also, several 112 problems remain. Submission of formal drawings and correction of the 112 indefiniteness is still required.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3728

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
